Family safety basics

Keep your data secure

Tips from parents at Google

## Lay the groundwork

As a parent or guardian, you know what feels right for your family and how your kids learn best. To help your family navigate through new technologies, gadgets and services in an ever-changing online world, it helps to get practical advice. That's why we continuously talk to safety experts, parents, educators and communities around the world – to keep a pulse on what works. Together, we can help nurture a community of responsible digital citizens.

**Family safety basics**

For busy parents, get some quick suggestions for how to help keep your family safe online.
